Contract File

Dear Jack:

P+E
In connection with our contract with you for a laser enlarger [redacted], one of our engineers, [redacted] will give a talk on 26 January, 1964 before the Optical Society of America on "Some Unusual Optics". In addition to referring to other programs not connected with you, he would like to make reference to the use of coherent (laser) light in photographic enlargers. An abstract of his references is attached. He assures me that all of this material is available from published sources and that there will be no references to our contract or to your organization.

STAT

Also attached is a proposed paper on "The Optical Specification of Photographic Viewer" which our [redacted] wishes to publish. It bears some relation to work done under your contract but is not directly dependent on it and makes no reference to it.

STAT

Both of these items, I think, can be easily attributed to company sponsored work, since they are included within our normal fields of interest. I don't feel that there would be any security objection to their publication but we would like your comments. Please let us know your decision as soon as possible.

Regards,

[Signature]
Pat
